## SECTION 1: Global Chemical Inventory Status

This product and all components are listed on the following chemical inventories.

COUNTRY	NAME OF CHEMICAL INVENTORY	STATUS
United State	Toxic Substances Control Act Inventory (TSCA)	Listed
Canada	Domestic Substance List/Non- Domestic Substance List (DSL/NDSL)	Listed
Europe	European Inventory of Existing Commercial Chemical Substances (EINECS)	Listed (Exempted for polymer)
Japan	Japanese Existing and New Chemical Substances Inventory (ENCS)	Not listed for 1 chemical
China	Chinese Chemical Inventory of Existing Chemical Substances (IECSC)	Listed
Korea	Korea Existing Chemicals Inventory (KECL)	Listed
Taiwan	Taiwan's national existing chemical inventory (TSCI)	Listed
Australia	Australian Inventory of Chemical Substances (AICS)	Listed
New Zealand	New Zealand Inventory of Chemicals (NZIoC)	Listed
Philippines	Philippine Inventory of Chemicals and Chemical Substances (PICCS)	Listed
Vietnam	National Chemical Inventory (NCI)	Listed
Thailand	Thailand Existing Chemical Inventory (TECI)	Listed

## SECTION 2: Food Contact Compliance

- Regulation (EC) No 1935/2004 (Framework)

TPE maintains the adequate records of purchase, sales, distribution and all stage manufacturing to fulfill the requirements of Traceability (Article 17).

- European Union (EU) Food Contact – Commission Regulation (EU) No 10/2011

This product meets the requirements for plastic materials and articles intended to come into contact with food as described in Commission Regulation (EU) No 10/2011 and its amendment (Commission Regulation (EU) No 1282/2011, 1183/2012, 202/2014, 2015/174, 2016/1416, 2017/752, 2018/79, 2018/831, 2019/37, 2019/1338, 2020/1245, 2023/1442 and 2023/1627). Monomers and additives used to manufacture of this product are listed in "Union list of authorized substances" (Annex I) of this regulation. No Monomers subject to restriction (Specific Migration Limit – SML) are used in manufacturing. There is one additive subject to a Specific Migration Limit (SML) of 6 mg/kg and the result is not exceeded the limit and no dual used additive in this product. The overall migration under the conditions 2 hr at 100°C (OM5), in the standard food simulants (A, B, C, D1 and D2) is less than 10 mg/dm<sup>2</sup> as the maximum overall migration from plastic materials and articles. The specific migration of heavy metal does not exceed their limits as well. This product should be used at temperature below 300°C to prevent the degradation of product or unforeseeable conditions

- US Food and Drug Administration (FDA)

This product meets the FDA requirements contained in the Code of Federal Regulations in 21 CFR 177.1520 Olefin polymers (c) 2.2 referred to polyethylene for use in articles used for packing or holding food during cooking.

- China - National Food Safety Standard

GB 4806.1-2016

This product meets the requirement of National Food Safety Standard: Plastic resin used in Food contact (GB 4806.1-2016). Polyethylene is listed under reference No.91 with no monomer restriction in Table A.1 Plastic resin allowed to use and use requirements.

# Declaration of Compliance

Product Name

SCGC™ HDPE

Product Type

H619F

Issue date 1 January 2024 (Valid for 1 year from the last version)

## GB 31603-2015

In accordance with the quality systems that we certify and conform to the requirement ISO9001, it could be said that this product is manufactured in accordance with good manufacturing practice as outline in National Food Safety Standard - General hygiene norm on manufacturing of food contact materials and articles (GB 31603-2015).

## GB 4806.6-2016

This product meets the requirements of National Food Safety Standard: Plastic Resin used in Food Contact (GB 4806.6-2016).

## GB 9685-2016

Additives and polymer used to manufacture of this product are listed in National Food Safety Standard: Standard for the Use of Additives in Food Contact Materials and Their Products (GB9685-2016) and the dosage amount of additives are not exceeded the maximum level (%) for plastic (PE) as specified in Annex A, Table A.1.

- Japan Food Contact

### PL Certificate

This product is registered under Japan Chemical Innovation and Inspection Institute (JCII) with the Registration No. [A]EZar-16064-L , I c-1-E-Zar

### Japan Food Sanitation Act

Japanese Ministry of Health, Labor and Welfare (MHLW) published a formal Positive List (PL) System for food-contact materials (FCM) used in the manufacture of food-contact utensils, containers, and packaging (UCP) and amended in Japan Food Sanitation Act (Issued date: December 24, 2021)

Polymer is listed on Table 1(1) Base Polymers (Plastics) as Polyethylene, Synthetic Resin Group 5, all types of food, and maximum temperature III. Additives in this product are all listed on Table 2 Additives. Meet the maximum use limit(s) and restriction(s).

The manufacturer of food-contact materials and articles made from or containing this product must ensure that the finished materials or articles meet the regulatory requirement under the Japan Food Sanitation Act.

- Thailand Food Container and Packaging Materials

This product meets the requirements of Thailand Industrial Standard for Polyethylene Resin (TIS 816) including the food safety criteria (migration of substances from plastic materials) as tested by the methods specified in TIS 656: standard methods of analysis for plastics used for food contact. In addition, this product meets the requirement of Notification of the Ministry of Public Health (No.435) B.E.2565 (2022) which is a standard for container made from plastic used for containing milk or milk product.

### SECTION 3: Environmental Legislations

This product meets the relevant requirements of the following directives or regulations:

- Directive 94/62/EC on packaging and packaging waste (PPWD) : total incidental cadmium, chromium, lead and mercury less than 100 ppm.
- Coalition of Northeastern Governors (CONEG): total incidental cadmium, chromium, lead and mercury less than 100 ppm.
- Directive 2011/65/EU (RoHS) on the restriction of the use of certain hazardous substances in electrical and electronic equipment : Cadmium less than 0.01% wt and Lead (Pb), Mercury (Hg), Hexavalent chromium (Cr6+), Polybrominated biphenyls (PBB), and Polybrominated diphenyl ethers (PBDE) less than 0.1% wt.
- Commission Delegated Directive (EU) 2015/863 amending Annex II to Directive 2011/65/EU (RoHS) : Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP) and Diisobutyl phthalate (DIBP) less than 0.1% wt.

### SECTION 4: REACH

- EU-REACH : Regulation (EC) No.1907/2006

Under REACH Regulation (EC) No 1907/2006 and its amendments, polymers are exempted from registration according to the provisions of Title II (Article 2(9)). However, monomers have to be registered, if they are part of the polymer for more than 2% and if they are produced or imported in a volume of more than 1 tpa.

At this stage, we already completed the registration for our monomer (Ethylene, But-1-ene and propene) through TPE's appointed Only Representative (OR) since 30 Nov 2010.

Substance Name	CAS No.	EC No.	Registration No.
Ethylene*	74-85-1	200-815-3	01-2119462827-27-xxxx
But-1-ene	106-98-9	203-499-2	01-2119456615-34-xxxx
Propene	115-07-1	204-062-1	01-2119447103-50-xxxx

\* is monomer for this product

In additions, there are no inclusions of Substances of Very High Concern (SVHC), as defined under REACH Regulation (EC) No 1907/2006, in the manufacturing process of our products, in a concentration above 0.1 %. The Candidate List of Substances of Very High Concern (SVHC) for authorization is available on ECHA's website; please use the following link: <http://echa.europa.eu/web/guest/candidate-list-table>

- UK-REACH

From January 1, 2021, the United Kingdom (UK) is no longer part of the European Union. Consequently, the EU REACH Regulation EC/1907/2006 no longer has jurisdiction in the UK. Accordingly, UK government has established its own independent chemicals regulatory framework, UK-REACH. To comply with UK REACH regulation, companies importing substances into Great Britain (GB) must submit a Downstream User Import Notification (DUIN) to Health and Safety Executive (HSE) by October 27, 2021.

DUIN submission of the substances listed hereafter are completed through TPE's appointed Only Representative (OR). This will allow for a continued supply of our products into the GB market until the deadlines (2 – 6 years, depending on tonnage band and hazardous properties) set for registration under UK REACH.

Substance Name	CAS No.	EC No.	Registration No.
Ethylene*	74-85-1	200-815-3	UK-20-3526934878-1-0000
But-1-ene	106-98-9	203-499-2	UK-20-3526934878-1-0000
Propene	115-07-1	204-062-1	UK-20-3526934878-1-0000

\* is monomer for this product

- TURKEY-REACH (KKDIK)**

In order to comply with the Turkish KKDIK and SEA regulations, chemical substances that are placed on the Turkish market for above 1 tonne per year must be (pre)registered, and hazardous substances regardless of their volume must be notified respectively with the Turkish Ministry of Environment and Urbanization's (MoEU) Chemical Registration System (KKS).

The (pre)registration(s) and SEA notification(s) of the substances listed hereafter are completed under KKS as TPE's appointed Only Representative (OR).

Substance Name	CAS No.	EC No.	Registration No.
Ethylene*	74-85-1	200-815-3	02-0000375259-08-0000
But-1-ene	106-98-9	203-499-2	02-0000375259-08-0000
Propene	115-07-1	204-062-1	02-0000375256-20-0000

\* is monomer for this product

## SECTION 5: Substances of Concern

The following substances are not intentionally used in the manufacture or formulation of this product. However, this product has not been tested for those substances.

- California Proposition 65

Substances listed in California Proposition 65, Chemicals known to the State to cause cancer or reproductive toxicity are not used in the manufacture or formulation of this product.

[http://oehha.ca.gov/prop65/prop65\\_list/newlist.html](http://oehha.ca.gov/prop65/prop65_list/newlist.html)

Moreover, trace levels of n-Hexane (CAS no. 110-54-3), Benzene (CAS no. 71-43-2) and Toluene (CAS no. 108-88-3) may be present as a result of the specification characteristics of the raw materials and/or the manufacturing process. We inform you that we do not test each grade we sell to check the potential presence of trace amounts of each chemical listed in the Proposition 65 List.

Issue date 1 January 2024 (Valid for 1 year from the last version)

- **Animal Derived Materials/Bovine Spongiform Encephalopathy (BSE)/Transmissible Spongiform Encephalopathy (TSE)**  
Animal fats, oils, milk products or other animal- or tallow-derived products are not intentionally used in the manufacture or formulation of this product.
- **Antimicrobial agents/Fungicides/Pesticides**  
Antimicrobial agents, fungicides or pesticides are not intentionally used in the manufacture or formulation of this product.
- **Food Allergens**  
Food allergens (such as peanuts, lupine, soy/ soybeans, carmine/ cochineal, milk, eggs, fish, shellfish/ crustacea, tree nuts, celery, sesame seeds, mustard, glutamates, glutamic acid, MSG or hydrolyzed vegetable proteins, nitrites or sulfites, or grains/ cereals containing gluten substances) are not intentionally used in the manufacture or formulation of this product.

## Bisphenol

The following Bisphenol are not intentionally used in the manufacture or formulation of this product.

SUBSTANCES	CAS NO.
Bisphenol A	80-05-7
Bisphenol AP	1571-75-1
Bisphenol AF	1478-61-1
Bisphenol B	77-40-7
Bisphenol BP	1844-01-5
Bisphenol C	79-97-0
Bisphenol C 2	14868-03-2
Bisphenol E	2081-08-5
Bisphenol F	620-92-8
Bisphenol G	127-54-8
Bisphenol M	13595-25-0
Bisphenol S	80-09-1
Bisphenol P	2167-51-3
Bisphenol PH	24038-68-4
Bisphenol TMC	129188-99-4
Bisphenol Z	843-55-0
Dinitrobisphenol A	5329-21-5
Tetrabromobisphenol A	79-94-7

- Epoxy Derivatives

Bisphenol A diglycidyl ether (BADGE), bisphenol F diglycidyl ether (BFDGE) and novolac glycidyl ether (NOGE) are not intentionally used in the manufacture or formulation of this product.
- Dimethyl Fumarate (DMF)

Dimethyl Fumarate is not intentionally used in the manufacture or formulation of this product.
- Triclosan

Triclosan (2,4,4'-trichloro-2'-hydroxydiphenyl ether) is not intentionally used in the manufacture or formulation of this product.

- **Asbestos**  
Asbestos is not intentionally used in the manufacture or formulation of this product.
- **Azo Colorants/Pigments**  
Azo colorants or other pigments are not intentionally used in the manufacture or formulation of this product.
- **Benzophenones, 4-methylbenzophenone and Hydroxybenzophenone**  
Benzophenones, 4-methylbenzophenone and Hydroxybenzophenone are not intentionally used in the manufacture or formulation of this product.
- **Butylated hydroxyanisole (BHA) and Butylated hydroxytoluene (BHT)**  
BHA and BHT are not intentionally used in the manufacture or formulation of this product.
- **Benzenamine, N-phenyl-, Reaction Products with Styrene and 2,4,4-Trimethylpentene (BNST)**  
BNST is not intentionally used in the manufacture or formulation of this product.
- **Alkylphenols and Ethoxylates**  
Alkylphenols, ethoxylates such as Nonylphenol (NP), Nonylphenol Ethoxylates (NPE) and Tris (nonylphenyl) phosphite (TNPP) or estrogen-mimicking compounds are not intentionally used in the manufacture or formulation of this product.
- **Formaldehyde**  
Formaldehyde is not intentionally used in the manufacture or formulation of this product.
- **Melamine**  
Melamine is not intentionally used in the manufacture or formulation of this product.
- **Eposidised Soyabean Oil (ESBO)**  
Eposidised Soyabean Oil (ESBO) is not intentionally used in the manufacture or formulation of this product.

- Primary Aromatic Amines (PAAs)

Primary Aromatic Amines (PAAs) are not intentionally used in the manufacture or formulation of this product.
